

To Our Valued Partners:

I'd like to take this opportunity to introduce you to SaltStick Vitassium, the only capsule formulated to provide sodium and potassium in a balanced buffered form for individuals seeking to increase their sodium intake. Vitassium helps maintain electrolyte levels, support healthy blood pressure, reduce fatigue, support cognitive function, and reduce dizziness due to low blood pressure. We are writing because your clinic was referred to our team as a potential partner for our Vitassium Physician's Program.

ABOUT SALTSTICK

SaltStick was founded in 2006 by Jonathan Toker, Ph.D., an elite-level triathlete who hails from Canada and lives in Southern California. Dr. Toker received a Ph.D. in organic chemistry from The Scripps Research Institute in 2001, worked in the biotech industry for five years, and raced in the professional ranks as a triathlete and runner for five years.

SaltStick's first electrolyte product was SaltStick Caps, a supplement designed to closely resemble the electrolyte profile lost during activity: sodium, potassium, calcium and magnesium. While the product was designed for athletes, over the years we received many reports from people in the dysautonomia community who informed us that SaltStick Caps were only way they could consume the high levels of sodium without upsetting their stomach.

SALTSTICK VITASSIUM

In the fall of 2016, after years of receiving reports from doctors, parents and patients about the benefits provided to the dysautonomia community by SaltStick Caps, and with the help of physicians and experts in the field, our team released **SaltStick Vitassium**, specifically designed to supply buffered sodium and potassium in a small stomach-friendly capsule.

- **SaltStick Vitassium** is the ONLY capsule formulated to provide sodium and potassium in a balanced buffered form for individuals seeking to increase their sodium intake.
- Vitassium helps maintain electrolyte levels, support healthy blood pressure, reduce fatigue, support cognitive function, and reduce dizziness due to low blood pressure.
- Made in the USA at a Current Good Manufacturing Practice (cGMP) facility.
- Each serving (2 capsules) contains: 500 mg sodium (22 mmol sodium, 1270 mg sodium chloride), 100 mg potassium.
- Tasteless capsules are small (size 0) and easy on the stomach.
- Vitassium is non-GMO, vegan, gluten free, preservative free, allergen free, starch free.
- Ingredients: Sodium chloride, potassium citrate, stearic acid, vegetable capsule.

SALTSTICK SUPPORTS THE DYSAUTONOMIA COMMUNITY

In July 2016, SaltStick announced our partnership with **Dysautonomia International**. We pledge to donate to Dysautonomia International 10% of all sales SaltStick Vitassium, which is specifically designed to help supply buffered sodium and potassium in a small stomach-friendly capsule. Donations exclusively fund research, patient awareness, and patient and family support.

In addition to donating 10% of proceeds from all Vitassium sales to Dysautonomia International, SaltStick also created the **Vitassium Club**, exclusively for individuals with dysautonomia, POTS or EDS that use SaltStick as a daily supplement. Members of the Vitassium Club receive 20% off all SaltStick electrolyte products when they purchase at www.ShopSaltStick.com.

***HOW SALTSTICK CAN HELP YOUR PRACTICE**

Through our **Vitassium Physician's Program**, SaltStick offers to donate free Vitassium 8-count sample packets to U.S.-based physicians and clinics who care for individuals with dysautonomia, POTS or EDS. Our Physician's Program began in 2015 with the original SaltStick Caps product, and has since grown to many clinics and care facilities around the country. An 8ct packet contains the equivalent of 2000 mg sodium, or 5g of salt, along with 400 mg of potassium.

We are writing to extend this offer to you and your practice. Your practice can order free samples online anytime through our B2B platform, or simply call or email me to place an order. We recommend that each dysautonomia patient receive one free packet of Vitassium capsules, coupled with encouragement to visit saltstick.com to learn more about Vitassium. In addition, we encourage physicians to recommend that patients join the Vitassium Club to save 20% on SaltStick electrolytes.
